

Ava Brooks

avacbrooks@gmail.com

(858)705-8732

New York, NY

EDUCATION

Fordham University

Bachelor of Science, Mathematics, Bachelor of Arts, International Political Economy

Dean's List Award: 2022-2026 || GPA: 3.78

New York, NY

Aug. 2022 - May 2026

EXPERIENCE

Digital Fellow

Brooklyn Sports & Entertainment

New York, NY

June 2026 - Present

- Support the Information Technology, Consumer Technology, and Data Analytics & Insights teams across Barclays Center, Brooklyn Nets, and NY Liberty operations
- Create custom GA4 report dashboards and collaborate with product owners to interpret and distribute insights to key stakeholders

Election Data Engineer

The Associated Press

Remote

April 2026 - Present

- Scrape and process real-time election results across the 2026 primary and general election cycles using automated Python pipelines, delivering accurate vote data under live, time-sensitive conditions in support of AP's election night infrastructure used by major downstream news organizations.

Crypto Research Fellow

Global Council on Crypto Taxation (GCOT)

Remote

Oct. 2025 - Jan. 2026

- Conduct research on digital asset policy and taxation, synthesizing laws, market practices, and expert input into concise policy memos and regulator-ready briefs.
- Develop regulation/deregulation proposals with clear rationale and impact, translate complex issues for non-technical audiences, provide monthly updates, track milestones, incorporate redlines, and contribute language for public comment letters and GCOCT communications.

IT Computer Assistant

Fordham University

New York, NY

May 2025 - Aug. 2025

- Deliver technical support for university-managed computers and printers, resolving escalated IT service requests via ServiceNow.
- Utilize cloud-based device management tools to monitor systems, apply patches, and ensure compliance.
- Collaborate with IT teams to resolve complex technical issues and participate in device replacement and large-scale deployments.

Data Analyst Intern

The Marcus Harris Foundation

Remote

Feb. 2025 - May 2025

- Conduct in-depth research and data analysis to expand the organization's grants database, identifying viable funding opportunities through various sources.
- Analyze funding trends and foundation contributions using Python and Excel to generate strategic insights
- Develop data-driven reports to assess grant feasibility and maximize alignment with program goals.

ACADEMIC RESEARCH

An Analytical Comparison of Tax Policies in the 2024 Presidential Election

Fordham University

New York, New York

Aug. 2024 - Dec. 2024

- Analyzed economic data using Python, differential equations, and visualization tools including LaTeX and TikZ to evaluate proposed tax plans by Donald Trump and Kamala Harris.
- Developed quantitative models to assess the impact of tax proposals on income distribution, government revenue, and economic growth.

Does Digital Campaigning Mobilize Young Voters?

Country First Academy

Remote

Feb. 2026 - April 2026

- Built a reproducible state-level dataset by parsing \$7.46B in political ad spend from the Meta Ad Library and Google Transparency Center using custom Python scripts and the Census API
- Estimated eight OLS regression models across all 50 states testing the relationship between digital ad spend and youth voter turnout, controlling for education, income, battleground status, and FEC disbursements

SKILLS:

Programming Languages: Python, SQL, Java, Jupyter, HTML || **Data Analysis/Visualization:** Excel, LaTeX, TikZ, Power BI, IBM
